Very pleased and nicely relaxedBy WhispersWrittenI live a very stressful life and wanted to have something to help me relax and enjoy something beautiful. Shopping for a coloring book seemed high on the list of something I would enjoy, but the coloring books I looked at all have very heavy lines. This gives them a stained glass look, which is beautiful, but I wanted something softer - like a pencil etching. This coloring book is just that! I felt like I was working piece of art which is highly satisfying. For the first time in weeks, I actually just slowed down and worked with the original artist to produce something beautiful. I am very pleased.3 of 3 people found the following review helpful. Perfect for adult coloring time!By Brandon M KellyI wanted a coloring book for myself for when my children are having their coloring time. This is such a wonderful and whimsical book. I really appreciate the thought of having the spine at the top, for I am left handed. I highly recommend this coloring

book!

This is a whimsical and somewhat suggestive adult coloring book. I designed this book with comfort in mind for right and left handed users. By making the spine of the book at the top as opposed to the side, I feel it will enable you to relax with your creativity and enjoy some color! \*Best use with color pencils\*
