This useful guide offers a clear, understandable, and accurate tour through the complexities of the human body. The Coloring Review Guide is ideal for one- or two-semester students of anatomy and physiology and for those preparing for professional examinations. By labeling and coloring each drawing, students actively participate in the formation of each page. This visualization and practice constitute important steps in the learning process and will prepare the student for future studies. The nearly 300 illustrations are designed for easy comprehension, while the amount of information presented in each image is carefully balanced for clarity. A set of FREE colored pencils are included with

each new copy of this guide.

About the Author Robert Stone is a Professor in the Biology Department at Suffolk County Community College and is also a co-author of the successful Coloring Guide to Anatomy and Physiology and Atlas of Skeletal Muscles.
