The few that were good took up less than half the pageBy customerI would not have bought this, had the "Look Inside" option had been available at that time. Most of the drawings were very simplistic, drawn with heavy lines. The few that were good took up less than half the page! I have never seen a worse coloring book for adults. I'm sorry to say it, but it was a complete letdown. I love landscapes, but the great majority of them could not be considered to be landscapes at all.0 of 0 people found the following review helpful.
