I assume these are done by a variety of artists. Some look more like computer generated line art, and some are more hand-drawn. I tend to like designs to color with some detail, but not so detailed that you lose your patience and eyesight. So I prefer the more simple designs, but there are definitely more complex ones if that is what you prefer. Many of the designs are centered on the page, so it isn't too intimidating. I easily finished my page (see my photos) in one evening. There are definitely some really intricate ones if you have the patience. Features of the book: -36 designs are on the front of the page only--nothing on the back-Crisp, clean line art (I hate it when the lines are blurry)-8.5x11" Bright white paper--the same as all the Createspace publications.-Pages are not perforated-Designs are suitable for markers (some pages will require a fine tip), colored

pencils, and gel pens.-Crayons will work for even some of the images.-Markers may bleed through, so use a blank page as a "color protector page".-Glossy front and back coversOverall, this book provides beautiful floral designs, and should keep you busy coloring for many days!I received a free copy of this book to test and give an unbiased review, and my opinions are based on actually using and coloring the book. I used Colleen Set of 60 colored pencils for my page.0 of 0 people found the following review helpful. Adult Coloring Books: Fascinating FlowersBy Starr RyersonThis is my first coloring book with a black background and it's lots of fun. I used my neon AmazaPens and the colors just "popped." The pictures look great. There are many nice pictures to color in this book, but I found they look best with just neon and glitter colors.0 of 0 people found the following review helpful.
