But if you're looking for a book like that and will feel "ripped off" with some blank space, then this isn't for you. I like supporting a person instead of a company.3 of 3 people found the following review helpful. I've been coloring since before coloring was coolBy Corinne SwarovskiTara is ridiculously talented, and I'm so thrilled she finally released a coloring book. As a graphic designer, I'm a little weird when it comes to most coloring books out there. I want to color something that is going to look classy enough to be framed, and Tara delivers. The paper is a good quality, so if you want to color and decorate, you're golden. If you are a fan of graphic awesomeness, you'll be a fan of this coloring book.1 of 1 people found the following review helpful. I was disappointed. disappointed. It's much thinner than I thought it would be and has a lot fewer patterns to color than I thought it would, with lots of white space. Having said that, I like the art that IS there, especially the cactus's for some reason, and we have enjoyed it.

Bust out those colored pencils and your mad skills... It's time to enjoy some rad and happy pattern play! 30 hand drawn bold patterns mixed with original lettering that range in complexity from piece of cake to master colorer. Coloring fans of all ages will enjoy using their favorite medium on the one sided 8x10 pages that make for easy framing and craft making. All pages were hand drawn and designed by Tara from Rad And Happy with some of her well known funny quotes incorporated in. (ie. Either you love donuts or you're wrong.) Donuts, pineapples, succulents, and bold patterns all work together to make a completely original and fun coloring experience.
