A Clever Way to See the Current Political WorldBy Dan CoughlinManton and Clue have crafted a very clever political message within the framework of a children's book. Whether you agree or disagree with them, it certainly makes for a very thought-provoking commentary on the current political landscape and the group dynamics that go with it. It will also make you think about leadership in a variety of professional and personal situations. It may even cause you to think of new ways of making your perspective known on important topics. Just by changing names in creative ways you can reposition a current trend in a new light. I encourage you to read this very fast book, and let the approach of the writers sink into the way you make your points about any issue.1 of 1 people found the following review helpful. A Must-Read for Children -- and Every Adult Living in the US!By Kimberly LiftonHow timely it is! This book is great for kids, but even better for adults, given today's political climate. It's a must-read story for teaching tolerance (and basic manners!) to children -- and Mom and Dad! The current presidential race seems to bring out the worst of the worst in everyone -- liberals, conservatives, socialists, communists, independents, environmentalists and so on.... This short book highlights some of the issues that have been permeating this presidential race, namely bullying, racism and intolerance. The authors point out the dangers of this national mood through a simple story that any child can understand. Read it, share it, and preach the message to your kids -- and to your friends who think the nasty rhetoric is okay. It's not. I love the line: "Make the

Prairie great again” and the message that it is already great. America is already great, too, so please teach that to your children. And to your friends who don't believe it. I especially like the discussion questions about leadership. What makes a good leader? We should all answer those questions, no matter what age. Thank you, Manton Clue. This is great!4 of 4 people found the following review helpful. Five StarsBy dianne jennersimple and entertaining enough that young and old will 'get it'!

Inspired by the campaign for President, this humorous allegory explores how bullying and manipulation have little to do with the art of leadership. When Patty pops up to play, A lousy Stump leads her friends astray. Facing only one choice, She finds her inner voice And saves her Prairie and the day.
