I wanted to find something that appealed to her interest in interior design and her taste for clean, modern aesthetic. I loved it and she loves it. We much prefer this style to the popular mandala, garden, frilly adult coloring books. If you like midcentury modern styles with openness to some others for variety, you'll enjoy this.-A couple of home exteriors-Many large room interiors, some with empty shelves so you can draw in your own things if you'd like-

A cute series of mid century-modern style furniture toward the back, so you can design patterns or color schemes This is really fun. I may wind up buying one for myself. 14 of 14 people found the following review helpful. Only 4 exterior photos similar to like the one on the front By corinna kinney Thought it would have more exterior photos.... Only 4 exterior photos similar to like the one on the front.. then many pages of furniture interior rooms... then a few pages of whimsical homes... 11 of 12 people found the following review helpful. LAME. By gbv4me This coloring book isn't as "cool" as it says it is. I was surprised at how thin the pages are, so markers are hard to use. Like other reviewers, I was expecting more exterior shots of houses to color - I had no idea that the majority of this book would be interior rooms with some furniture that was less than exciting. This coloring book is pretty cheap quality, and even though \$7 seems like a low price when compared to a lot of other adult coloring books on the market, I still think it's overpriced for what it is. This certainly didn't inspire my inner architect as I was hoping!
