Wow!!By Nancy PeppinThis is a fun book, I like having it, but the number of typos is unbelievable for a book that's been out for several years. Couldn't somebody copywrite it? It's digital now, so it wouldn't be hard.The book needs a category called How to read a book riddled with typos without screaming."0 of 0 people found the following review helpful. Awesomely Fact Filled and A Side of FunnyBy mkittysamomThis book covers everything, from building igloos, fishing, or what to do if an alien abducts you. Or if you happen to find yourself in a random jousting tournament. The last fourth of the book is more funny while 3/4 is practical. I hope that my brain has soaked it up in case of an emergency. I didn't speed read and actually took my time..because you just never know what could happen! There is really a huge amount of information and I believe I will keep this book handy and downloaded for future reference!
