Have you ever stopped to look at the natural beauty of a wall? There are so many types of distinctive walls; brick, stone, wood and even bamboo and they often make up very complex patterns that are perfect for coloring. I began looking for interesting walls for a greyscale coloring book awhile back and the result is this collection of 50 images featuring walls that are architecturally unique. Each image has been hand-processed using high-end computers, state-of-the-art software and our proprietary processing techniques to bring you sharp, vivid images that jump off the page unlike ordinary gray scale images that have been automatically lightened with graphics software. Each image is also

printed on its own page too so you can remove them for framing or gifts.
