tool to add to learning about weather. We can read the information and then use the questions for understanding.

Ideal for both home school and public education classrooms, Weather Wits Question Quest shapes the science topics from the "Weather Wits and Science Snickers: Corny Jokes and Cool Facts" book into an easily teachable series of 18 quizzes. The Volume 1 workbook offers the student multiple choice, fill-in-the blank and essay questions in the same light and informative style seen in the parent book. "Science Cap" questions challenge the student to apply logical thought patterns and provide insight into material not necessarily mentioned in the book. The material works well with all teaching styles; be it classroom discussion, self-quizzing or interactive team-group modes. A companion lesson planner and answer guide is available as Volume 2.
