Using affectionate humor, Fournier delivers both stark and subtle epiphanies alongside enduring truths, offering a deeper social commentary on the present conditions and future directions of American education. With an engaging satirical approach, the author spares no topic in casting a wide net over education, covering music and the arts, school

culture, leadership, assessment, staff development, history, technology, higher education, and many more.

" Fournier has firmly placed one foot in the pragmatic world of today, while the other points toward a future view of education where teachers and students are treated with respect, and all learners achieve to the best of their abilities. He does this through the medium of humor, and you are in for a genuine treat."
