There are a series of scenes, each spread across the seam between two pages, including Dizzyland, California, U.S.A.; Sydney, Australia; and Barcelona, Spain. Each scene contains certain people (such as "Bin Baby", his Ladketeers, and NSA Agent Dorsch and Patty Furst) and items (such as a scimitar, a landmine, a machinegun and a United Nations Map of Installations of Mass Destruction), as well as people and items specific to the scene, such as snails and frogs in France; bulls in Spain; and killer koalas, crocodiles and kangaroos in Australia!Someone donated a copy of this book to the troops here in Iraq, and several soldiers were passing it around when I discovered it and liked it so much, that I ordered a copy of my own!It provided me with plenty of

entertainment while waiting in airports/at airbases on my way to and from the U.S.A. for my mid-tour leave, and I still haven't looked for Bin Laden in all of the scenes!

By Texas User

So let me tell you the story of how I came by this little gem of a book. First off, I have to tell you first that my boyfriend's last name is Waldo (yes and it has haunted him for his entire life). With that being said, one day during lunch my colleagues and I were talking about one of their recent visits to the eye doctor where he read "the most politically incorrect book of his life"the where's bin laden book! Of course, seconds within hearing about this spin on where's waldo I was on buying it for under \$10 (winning). It arrived in the mail super quickly, and the commentary throughout the book is HILARIOUS. The boyfriend also liked it a lot and ignored me for a full 10 minutes looking for bin laden when I first gifted it to him. So if you have a good sense of humor, and you have a boyfriend who's last name is Waldo...I highly recommend this book!

My father in law got this as a present for Christmas. It was cute and funny, until we got to the back. In all Waldo books, there are extra lists in the back for items to search for in each spread. In the back of this book, there are similar lists. Some of these items are SO funny!!! They can be pretty crude things, so don't buy this for someone who is straight edged. After looking through his copy, my husband and I thought of a couple people who would love this. I came directly on and bought a copy. I got the CIA version cause it was cheaper, but it was cheaper because it was much smaller than the other. If you can find the regular version, definitely buy it instead of the CIA version. It is worth the couple extra dollars.

The mission is to locate Osama Bin Laden and his posse, as well as plenty of other people and objects, on each of the brilliant and colourful spreads inside this book. Set in some of the biggest iconic locations of the decadent Western capitalist lifestyle Paris, London and New York among others this tongue-in-cheek and fun-filled book also has a host of local characters and objects to find and tick off in the checklist at the back of the book.
