James Stevens, David Bishop : Who Killed Kennedy: The Shocking Secret Linking a Time Lord and a President (Doctor Who)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Who Killed Kennedy: The Shocking Secret Linking a Time Lord and a President (Doctor Who)*:

By Mary Pat Casey
That was easy
1 of 1 people found the following review helpful. Starts well, but tries too hard to do everything at once
By A Customer
A good idea, following the exploits of a journalist investigating the Third Doctor and his secret intergovernmental UNIT chums, this starts extremely well; the coverage of the first four or so Pertwee stories is extremely well-realised. Unfortunately, it goes very badly downhill through putting everything (including a catering kitchen of sinks, and a misjudged attempt to do *The X-Files*) into the mix. The villain behind it all simply doesn't fit in with what we know of him from the series, and resurrecting an unpopular companion of the Doctor's only works intermittently. It quickly becomes tedious - for fans of conspiracy theories and overdosing on continuity only.
0 of 0 people found the following review helpful. A different angle on the classic WHO universe.
By A Customer
WHAT does the world of Doctor Who look like to the outside observer? Bishop and Stevens take a look at the events during the UNIT years of Doctor Who from the viewpoint of an English reporter, unaware of the events that drive the Doctor's actions. Intertwining this with a tale featuring the Master, Ogrons, Autons, etc., the authors create a thought provoking story. This book does explore some of the darker underside of the Whovian earth, and shows that from the outside looking in, a different picture can be painted. A must read for the serious WHO fan.
