Michael Hall : Why Do Men Have Nipples? before purchasing it in order to gage whether or not it would be worth my time, and all praised Why Do Men Have Nipples?:

Why Do Men Have Nipples? has been written to uncover the truth about human creation and thought processes. The

book provides interesting facts and asks thought provoking questions which in many cases makes the reader discard the programming in their computer brain and take a new look at life and re-program the brain. The book contains some points that will make the reader laugh and ask the question why do humans behave the way we do and think the way we think? The book uncovers the human being as an electronic device capable of mental and physical actions associated with human made electronic devices. Enjoy the read. Love thy neighbour Michael

About the AuthorVicar Michael is the name I have chosen as it removes my second name or some would say family name. I have done this as I believe we should behave as one global family. I have used the name Vicar as I founded telepathicpartnership.com as an alternative to current religions and secret societies. I was born in the Universe like everyone else and have been living for an infinite amount of time. The particles I am made of have been recycled an infinite number of times and cannot be made or destroyed and are infinitely small. I had an average education which I have found useful. My strength is to bring facts together to create greater strength by associating one science with another. I have received much of the programming that many others have received in my computer brain. I operate my brain in a similar way to a computer by opening and closing folders. I have done many jobs including selling cars and running a touch screen computer company called MediPOINT. When MediPOINT entered into a court case at The Royal Courts of Justice, Strand, London and the Judge said "I suppose the conspiracy theory is out then" and MediPOINT was wound up it drove me to ask the question who is running our legal system? The court case drove me to frustration and I ended up in a mental hospital with the diagnosis of manic depression which has more recently been diagnosed as schizophrenia for which I take medication. So is it mental illness or remote control? Who presses the remote control and why? Love thy neighbour Michael
