Nick Mayer : Wild Oceans Coloring Book: Saltwater Fish and Deep Sea Creatures before purchasing it in order to gage whether or not it would be worth my time, and all praised Wild Oceans Coloring Book: Saltwater Fish and Deep Sea Creatures:

0 of 0 people found the following review helpful. Beautiful and instructional coloring bookBy CustomerJust got the coloring books today. Wonderful illustrations and the color suggestions and patterning recommendations are a great idea. Love the step by step guides in the beginning. I really think my newhews will enjoy this coloring book.0 of 0 people found the following review helpful. Educational Fun for the Whole FamilyBy A. HeepOne common complaint I encounter from fellow colorists is that they want their husbands/fathers/boyfriends/brothers/sons to join the adult coloring ranks, but they can't find any coloring books that appeals to them. Well, this is the book that fills this void. Of

course you don't have to be a guy to enjoy it. I'm not a guy, nor am I particularly outdoorsy (unless gardening counts). If you think that marine life is boring or monochrome, think again. There are some wonderfully vibrant species in this book. So, no worries, you'll get to use your reds, blues, oranges, yellows, greens etc. Or, you can use soft, neutral, earthy or even metallic colors and create some beautiful scallops, seahorses, starfish, oysters etc. Of course you also get to choose from plenty of colorful fish species. Here are the factors that appeal to me particularly, and that I find others of any coloring skill and background will enjoy: The book includes tutorials that are easy to understand, including one on how to do fish eyes. The designs give you a chance to color realistic, lifelike subjects. The pages are perforated for easy removal. You learn something new because of the factoids on the back of each page. The paper is of high quality. You get real-life, color examples of the species on which the drawings are based. You can learn new techniques, or improve upon existing ones. People are always on the lookout for something different and unique, so I find that these words are often overused. In this case, both adjectives are warranted. The main factors that make this book different from most, besides the subject matter, are:- The factoids for each subject appear on the back of the page, so when you remove it and display it in a binder you can see the appropriate fact. - Most books, if they have any pertaining info, have it printed on the left side of the image on the back page of the preceding design. - Some of the pages have a separate, removable section on the bottom of the page that includes a color palette suggestion and color example. Here is a suggestion: Make this book a nice addition for family activity time because you can have everyone pick something, remove their favorite pages from the book, and color away.* I received a complementary copy of this book in exchange for an unbiased review. 0 of 0 people found the following review helpful. ... not had time to color but the pictures are nice and I am looking forward to relaxing and doing ... By Beachwalker Have not had time to color but the pictures are nice and I am looking forward to relaxing and doing some adult coloring.

Coastal Life Beachcomber Coloring offers dozens of marine illustrations to color that are not only technically accurate, convincing, and powerful, but are also fresh, spontaneous and full of life. These sea life portraits meet the highest standards of anatomic accuracy and knowledge. Nick Mayer knows his subject matter intimately based on a lifetime of study and pursuit of the various species and executes at the highest level. But he fills his imagery with artistic qualities as only a fine artist can do. The end result is some of the very best imagery available today in the field of Sporting Art.

About the Author Nick Mayer is an award winning nature illustrator whose style embraces the natural beauty of fish and other marine life with a unique scientific perspective. He is a former marine biologist, an adventurer, and a lifelong fly fishing addict. A skin of his teeth survival falling overboard off a commercial fishing vessel into the Bering Sea followed by a near float plane crash in Northern Labrador inspired Nick to pursue his true calling as an artist. Painting is his passion and he has developed a celebrated touch. He has illustrated two books on fish, and his work and licensed products can be seen in galleries and stores in more than 30 countries around the globe.
