Well written, hysterical in sections and full of information ...By Cast Iron CowboyWell written, hysterical in sections and full of information from a man who has literally done it all. Very limited printing. Order Wild Thing if you can find it. Stacy's story on the wolf chili is not what you think and is simply side splitting.3 of 3 people found the following review helpful. For the outdoor lover - at once philosophical and humorous.By John M. Neuhold (njohn@sisna.com)Gebhards writes of his experiences in lucid prose expressing his

love for the wilderness with philosophical insights punctuated with humorous anecdotes. He traces his enchantment with the "Wild Thing" from his boyhood in the Mississippi bottom lands to the formalization of his education at Utah State University to his employment as an Idaho fishery biologist, mule skinner, folk musician, reluctant politician, winter survivalist, camp cook, wilderness meteorologist and wild river runner. His tales are loaded with humor sometimes wry and other times raucous. A modern mountain man, Gebhards' love of the Rocky Mountain wilderness is unrelenting as it is passed on to the reader. 0 of 0 people found the following review helpful. Superb Work By a Superb Man By A Customer Stacey has many talents of the great game of life and believe it or not, they are almost all useful to the Californian Mountainman. His book is very funny it is very hard to put it down when nature calls.
